

eSentire CISO and Advisory Services

Cybersecurity Advisory Services to Develop Your Cybersecurity Strategy and Keep you On Track

We evaluate your strategy

We complete a 15-point cybersecurity program assessment to understand your current strategy and inform your future strategy.

Build your action plan

We align your cybersecurity strategy, business objectives and risk, enabling efficient roadmap development

Set your program objectives & support execution

Your refined strategy is delivered by a member from eSentire advisory team who becomes an extension of your team and builds a program tailored to your business.

Demonstrate value and clear results

Gain buy-in for a comprehensive program development at the board level while meeting and exceeding compliance mandates.

Your Challenges

Many organizations find themselves stuck between ever-evolving cyber threats and tightening regulatory requirements. This can force organizations to piece together and execute informal programs that check the compliance box, but don't necessarily align and address the greatest areas of cyber risk.

Our Solution

Our CISO and Advisory team's approach includes a NIST based organization-wide cybersecurity maturity assessment as part of every engagement. This ensures our experts understand your strengths, weaknesses, and greatest areas of cyber risk.

Our **Strategic Services** take the insights gathered from the maturity assessment and use them to help you develop a comprehensive cyber resilience strategy. This strategy is customized to your unique requirements and organizational objectives. We focus on identifying your existing cybersecurity capabilities and any gaps that need to be addressed. Our goal is to define a clear roadmap that guides your organization towards a state of greater cyber resilience.

Our **Assessment Services** are designed to assess and review various aspects of your organization, including exposure, vendor risk, and the security of your assets. We also assist in testing your incident response capabilities to ensure that you are prepared to respond effectively in the event of a cybersecurity breach.

Our **Continuity Services** extend beyond the technical aspects of cybersecurity. As Subject Matter Experts (SMEs), we can guide your team through the complexities of governance and compliance, helping you meet regulatory requirements while implementing industry best practices. We offer training and support throughout your cybersecurity journey.

How We Help

Our CISO and Advisory Services address each component of your cybersecurity posture. These are all aligned to one singular strategy and measured across a multi-year engagement.

Strategic Services	Assessment Services	Continuity Services
<ul style="list-style-type: none"> • Cyber Resilience Roadmap: eSentire advisor will interview executives to understand business goals and create a roadmap that aligns with your Cyber resilience strategies. • SEC Readiness Pack: eSentire can prepare you for the new SEC guidance released in Oct 2023 • Vendor Risk Management: Establish a process to track third-party and vendor risks to your business. • Asset/Data Classification: Identify critical assets and assist in classifying them and prioritizing security measures to protect these assets. • Security Technology Evaluation: Provide guidance and advice for security technology recommendations as it pertains to your business and regulatory requirements. 	<ul style="list-style-type: none"> • Risk and exposure assessments: Conduct risk/compliance readiness assessments and provide remediation steps. • Security Policy Guidance: Review, assess, and assist in developing and tailoring information security policies to address your particular cybersecurity threat and regulatory compliance requirements. • Incident Response Planning: Review, assess, and assist in developing a cybersecurity incident response plan. 	<ul style="list-style-type: none"> • Board communications, presentations, training: Deliver communications to the board, including presentations on cyber risk as it pertains to your organization. Training can be facilitated to educate the board on current and future cyber risk landscape. • Regulatory Compliance: Review and ensure the organization is following set rules to protect sensitive information and human safety. • Incident Response Testing: As part of the engagement, our team also conducts an annual reassessment of the plan and tabletop exercise to test the efficacy of the response measures. • Continuous security metrics and KPIs: Develop security metrics and KPIs to measure the success of security program. • Participation in IT Governance/ Risk Committees: Participate in IT Governance and Risk Committee's as an SME to provide advice and guidance.
